

TUSHAR BATHAM

+91-9755247877 – batham.tushar2001@gmail.com – LinkedIn – GitHub – Bhopal, Madhya Pradesh, India

PROFESSIONAL SUMMARY

Software Development Engineer with 1+ years of professional experience designing and shipping scalable, fault-tolerant distributed web applications and real-time systems serving global users across 20+ countries. Proficient in Python, JavaScript, TypeScript, Java, and C++, with hands-on expertise in object-oriented programming, large-scale computing, REST API design, AWS and GCP cloud-native deployment, and software security compliance. Demonstrated ownership of mission-critical systems from architecture through production with a focus on operational excellence and continuous improvement.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, C++, SQL
- **Distributed Systems and WEB DEV:** React.js, Node.js, Express.js, Flask, Django, REST APIs, WebSocket, Microservices, Low-Latency Real-Time Systems, Event-Driven Architecture, Fault-Tolerant Design
- **Cloud and DevOps:** AWS, Google Cloud Platform (GCP), Firebase, Docker, Continuous Integration, Continuous Deployment (CI/CD), Linux, Auto-Scaling, High Availability
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase; query optimization and efficient indexing for high-performance large-scale data access
- **Algorithms and Data Mining:** Scalable algorithm design, information extraction, large-scale data processing, automated metric monitoring and auditing
- **Machine Learning and AI:** TensorFlow, PyTorch, OpenCV, CNN, Generative AI, NLP, Transfer Learning
- **Other:** Git, GitHub, Agile/Scrum, System Design, Security Compliance, Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

Builtattic – builtattic.com Aug 2025 – Present
Software Development Engineer India, Remote

- Led the design and development of builtattic.com, a live global AEC marketplace supporting multi-currency transactions across 20+ countries, vendor onboarding, and subscription billing, improving platform performance by **30%** through distributed system architectural improvements.
- Engineered low-latency RESTful APIs and WebSocket connections enabling real-time data synchronization with sub-100ms response times across distributed system components, reducing user-facing latency by **40%**.
- Owned end-to-end deployment of 8 AI-powered SaaS tools (VitruviAI, Faust, Design Studio, Matters, Vision, Valuator, Material Studio, Summaries) on Google Cloud Platform with auto-scaling, ensuring 99.9% availability under global traffic spikes.
- Implemented fault-tolerant secure multi-currency payment processing and user authentication systems in compliance with organizational software security standards.
- Established automated metric monitoring and auditing pipelines to proactively detect system anomalies; collaborated with cross-functional designers, product managers, and engineers in agile sprints to deliver operational excellence.

M.P. State Co-operative Consumers Federation Ltd Jun 2024 – May 2025
Software Developer Indore, Madhya Pradesh, India

- Built and led delivery of a customized ERP system with database integration, reducing data processing time by **40%** through query optimization and automated data pipelines serving **500+ daily users**.
- Designed fault-tolerant database schemas with efficient indexing for high-performance queries on large-scale datasets; created dashboards that reduced reporting time by **25%** for business stakeholders.
- Developed automated Python scripts for information extraction, eliminating **10+ hours** of manual weekly data management; translated ambiguous stakeholder requirements into scalable production solutions.

KEY PROJECTS

Builtattic Marketplace Platform – builtattic.com React, Node.js, WebSocket, MongoDB, GCP

- Led development of a large-scale, multi-region marketplace with real-time bidding and notifications, achieving sub-100ms end-to-end latency at scale across 20+ countries with multi-currency payment support.
- Deployed fault-tolerant auto-scaling infrastructure on GCP handling traffic spikes efficiently; designed MongoDB schema with optimized indexing delivering **60% faster** query response times.

Vitruvi-AI – Generative AI Architecture Tool – builtattic.com/pages/vitruviai Python, GCP, Generative AI, REST APIs

- Architected scalable low-latency AI inference pipelines on GCP; built RESTful microservices with NLP-based information extraction, reducing architectural concept development time by **60%** – live in production.

Real-Time Object Detection System – github.com/Heisenberg1912 Python, OpenCV, TensorFlow, CNN

- Developed CNN-based object detection system achieving **95% classification accuracy** via transfer learning; optimized large-scale model inference to **30+ FPS** with continuous automated production monitoring.

EDUCATION

Medicaps University 2021 – 2025
Bachelor of Technology (B.Tech) in Computer Science Indore, Madhya Pradesh, India

CERTIFICATIONS AND ACHIEVEMENTS

- Google Certified – Machine Learning and AI Fundamentals Infosys Certified – Software Development and Programming
- Udemy – Full Stack Web Development, Python
- **Hackathon Finalist** – Led rapid prototyping under ambiguous time-constrained conditions; successfully owned and shipped multiple live production systems including a globally accessible marketplace at builtattic.com
